

Early Intervention Implementation Checklist

Responsive Relationships

Building Partnerships with Families

Preparing for the Visit

- ☐ Schedule visits in the home and community during times that are convenient for the family based on the routines, activities, or strategies the family would like to address.
- ☐ Provide caregiver with community resources (e.g., parenting groups, events, brochures, websites, flyers, handouts, videos) based on caregiver's priorities or concerns.

During the Visit

☐ Greet caregivers and children by name		Greet	caregivers	and	children	by	name
---	--	-------	------------	-----	----------	----	------

- ☐ Call caregiver and child by name throughout the visit.
- ☐ Use materials found in the natural environment.
- ☐ Observe and ask the caregiver about priorities, beliefs, family activities, and routines.
- ☐ Invite caregiver to share their thoughts, ideas, perspectives, and/or preferences on what they consider to be priorities during each visit (e.g., strategies to implement, goals to address, routines, and materials/activities used).
- ☐ Explain philosophy of early intervention services, describe how early intervention visits might look, and asks caregivers to share their ideas on how they would like visits to look.
 - ► This typically occurs during the initial visit.
 - ▶ With some families, practitioners may have to revisit this conversation.

After the Visit:

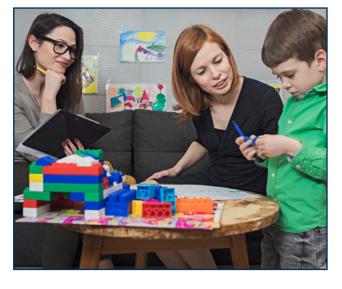

Titel the visit.
\square Connect with others to discuss their biases and how they might impact their connections with families.
Notes, thoughts or ideas:

Supportive Conversations

1

Ш	Use a	calm,	positive	and	supporti	ve	tone	of	voice.
---	-------	-------	----------	-----	----------	----	------	----	--------

- ☐ Limit jargon, and uses language caregivers understand.
- ☐ Check for understanding and explains technical terms to caregivers.
- ☐ Speak to caregivers and children who are multilingual using key words from their language.
- Use a variety of strategies to communicate using the caregiver's preferred language (e.g., observes or affirms cultural mores related to communication style, use of a translator, or providing resources/notes in the preferred language).
- Ask caregivers their preferred method of communication (e.g., text, email, phone).

Notes,	houghts or ideas:
	Relationships
	narily focus support on the caregiver and the caregiver's interactions with their child.
	ide supportive and descriptive feedback to the caregiver during caregiver-child interactions in the following ways:
	Caregiver implementation of a practice or strategy
	Caregiver's contingent response to their child's cues/communicative attempts
•	Caregiver's present strengths (e.g., predictable routines, supporting child's social emotional development, supporting child's communication attempts, preventing or responding to challenging behavior)
•	Caregiver's support of peer interactions
•	During games and activities
□ Dire	ct caregiver's focus towards child initiations, responses, cues, and/or expressions.
	aborate with caregiver to identify predictable routines.
□ Ask	caregiver preferences in how they would like their child to participate in routines and activities.
□ Prov	ide opportunities during the visit for caregivers to practice new skills to:
•	Support child's communication attempts
•	Support child's participation during predictable routines
•	Support child's social emotional development
□ Assi	st caregiver in identifying and engaging in social sensory or turn-taking games with their child.
	a variety of strategies (e.g., modeling, specific feedback, commenting) to support caregiver in following child's lead during actions (e.g., labeling objects the child points to, imitating child's actions, sounds, or words, following a play idea).
□ Mod	lel or provide caregivers choices of strategies to use to expand on children's communication attempts.
□ Sha	e information about caregiver strategies to support the attachment relationship.
_	age caregivers in conversations about ways they currently or would like to participate in responsive interactions with child (e.g., uses calm positive tone, displays of affection, hi fives, responds to child in distress).
feed	a variety of strategies (e.g. discussion, asking questions, modeling, commenting on child actions or responses, positive back) to coach the caregiver in providing positive attention (e.g., commenting frequently on appropriate behavior, e, hi five, commenting, play) to their child during interactions.
□ Ask	caregiver open-ended questions about their child's emotional responses, communicative attempts, behaviors, or cues.
□ Coa	ch caregiver in responding to challenging behavior by ignoring or redirection.
	houghts or ideas:

Family Coaching

Family	v-Cer	ntered	Coa	china

☐ Provide information about	supports and strategies in caregivers' preferred language.
☐ Frequently comment on ca	regiver strengths.
☐ Ask caregivers their preferre	ed learning style.
☐ Actively listen to caregiver's	s ideas, and offers additional suggestions when appropriate.
☐ Ask open-ended questions	in response to caregiver comments, questions, or concerns.
☐ Ask reflective or guiding qu	uestions to help caregivers make connections.
☐ Provide multiple forms of s (e.g., supportive, construction	pecific, performance-based feedback after observing caregiver-child interactions ive, video).
 Use modeling with caregive child's social emotional cor 	er permission (e.g., live, video) and reflective discussion to facilitate caregiver's support of their mpetence.
☐ Provide caregivers opportu	nities to practice new skills during visits.
☐ Assist caregivers in identify	ring opportunities to practice new skills during family routines or activities in between visits.
☐ Use data to inform coachin	ng decisions, and family and child outcomes.
